One of the best air fryers can only be a ticket when you want the comfort that only crispy French fries or Nashville-style chicken can bring, but really want to avoid all that bad fat for you. In one of these excellent countertop appliances you can cook chicken nuggets, wings, mozzarella sticks, onion rings and more using almost any oil in the process. The air fryer is different from the traditional fryer, where the food is immersed in a hot tub of oil. Rather it's like a souped-up convection oven with a fan to spread hot air around the food to crisp it as it bakes. Not only do you avoid adding excess fat to your diet, you don't have to drag home gallons of oil, heat it up slowly and then worry about recycling all that hot lubricant after you've finished cooking. If you think about all the oil you don't have to buy, air fryers just might pay off over time. Prime Day Deals: See all the best deals right now! You can also use an air fryer for roasting and baking. While you don't get results that are as perfect as a traditional oven, it can come in handy when you don't want to include a full-size oven for a small amount of food or need a second oven. What are the best air fryers? Based on our extensive research, we believe that Philips TurboStar Digital is the best air roaster for most people. At \$149, it's not too expensive and reviewers report that it consistently yields better results. However, it has a fairly small capacity of about 3 quarts, so when you cook for the crowd, you will have to fry the food in batches. If you're looking for a great capacity, GoWise USA Air Fryer comes in sizes from 5 to 7 quarts. And it's cheaper, with a 7-quart model selling for about \$89. With cuisinart Compact Air Fryer Toaster you get a deep-fried air that doubles as a toaster oven. If you only have room for one large countertop appliance, this may be the best choice. Unlike many air fryers, Cuisinart is not strangely shaped, but looks like a large stainless steel cube. Ninja Air Fryer receives high praise from both consumers and professional reviewers. It competes well with Philips for higher air quality frying results, but costs a lot less. Anyone looking for a truly versatile appliance should consider Ninja Foodi, which is not just French fries, but pressure and slow cooks, dehydrates, soots and more - and does it all well. It is, however, large, heavy and expensive. Small households and modest kitchens are best served with Krups Fry Delight. Although it only contains about 2 1/2 pounds of food, it doesn't take up much tabletop space compared to other air fryers. Best Air You can buy today Philips TurboStar Digital (Image credit: Philips) Type: Digital Size: 14.4 x 10.5 x 11.3 inches Capacity: 2.8 quarts / 1.8 pound Dishwasher-Safe Parts: Yes Easy to Clean: Yes Management App: No /Recipes Only Amazon Rating: 4.5 out of 5 Inthive Control With The temperature and setting of cooking for cleaning with a drawer, as design Expensive The Philips TurboStar Digital appears at the top of more lists than any other air fryer. Just shy of \$200, TurboStar Digital isn't the cheapest option, but you can rely on it to give excellent results and consistently turn food that tastes like it came out of deep fat fryer. Keep in mind, however, that it only has a capacity of 3 pounds of food so you can almost fry a whole little chicken cut into pieces at once. Because Philips has digital control, you set the temperature and time accurately. The basket, similar to a non-stick box, is easily removed and cleaned and can even fit in the dishwasher. The device is relatively compact and unlike many large and bulky models, it fits easily under standard cabinets when not in use. GoWise USA 5.8 quart 8-in-1 Digital Air Fryer (Image credit: GoWise USA) Type: Digital Size: 13.5 x 12.5 x 11.5 inches Capacity: 5.8 quart dishwasher-Safe parts: No Easy to Clean: Yes Management App: No /Recipes-book included Amazon Rating: 4.0 of the 5 Digital touchscreen with eight smart presets for different types of food Wide temperature range The Operation Heat from the outer frame can melt the nearby plastic elements Tray liners needed to prevent non-stick coating wear With eight programmed settings for various foods, a wide range of temperatures and an affordable price, GoWise 8-in-1 Digital Air Fryer is our top budget choice. And rest assured, it doesn't slouch when frying the air either. You just could convince your kids the french fries came from their favorite fast food restaurant. In addition to the large container, so you can cook all your chicken in one batch, GoWise has an alarm that you can set to remind you to substitute or flip your food while cooking to get even browning and crisp. You don't have to warm up a GoWise which timesaver and basket fry and nonstick to coat and the dishwasher is safe. If you need inspiration, GoWise comes with a cookbook full of recipes. Cuisinart Compact Air Fryer (Image credit: Cuisinart) Type: Analog Size: 15.5 x 16 x 14 inches Capacity: 3 pounds/0.6 cubic feet. | The dishwasher Safe Parts: N/A Easy To Clean: Yes Management App: No/Recipes and Books included Amazon Rating: 4.3 of 5 Multifunction use including air fry mode 60-minute timer with automatic shutdown Stainless steel exterior Larger footprint than most air fryers Than more expensive than basic models of fryer air Cuisinart Compact aier is much more versatile food than most other models on this list. In addition to being an air roaster, it's a convection toaster oven so it can be used for crispy bagels, roast 4-pound chicken, bake 12-inch pizza and broil burgers. Unlike most other fryers, it is not made of plastic and has the shape of a space capsule or a giant egg. Instead, it is built of stainless steel and has a square design with a glass door, so you can see the see food as she cooks. Not only will it fit neatly on the countertop, it will actually look good. However, despite its name, Cuisinart is not small and compact. The controls are not digital, which means there are no pre-programmed settings, and it's very easy to work with - you just turn well-marked dials. Ninja Air Fryer (Image credit: Ninja) Type: Digital Size: 13.6 x 11 x 13.3 inches Capacity: 4 quarts Dishwasher Safe Parts: Yes Easy to Clean: Yes Management App: No /Recipes and Books included Amazon Rating: 4.8 of 5 Four programmable cooking modes Wide temperature allows a range of dehydration. To keep warm before cooking Bad the smell of burnt rubber during cooking Ninja is relatively new to play fryer air, but it makes a darn good product. With 4.8 stars from reviewers, this is one of the most rated air fryers sold on Amazon. And rightly so, according to pro testers who claim to rival Philips for frying crispy potatoes and chicken nuggets. As it is very reasonably priced, this is a great purchase for those who are on a budget. It has digital controls and settings for heating, roasting and dehydration, as well as frying air. All of these options make it a little harder to get the hang out of ninja programming, but they will help you get perfect results without guessing at the right time and temperature. The rack is on, so you can cook two batches of food at once. Ninja Foodi (Image credit: Ninja) Type: Digital Size: 14.2 x 16.8 x 13.1 inches Capacity: 6.5 quart dishwasher Safe parts: Yes Easy to Clean: Yes Management App: No /Recipes and Books included Amazon Rating: 4.6 of the 5 Multipurpose cooking device Big is enough for a whole chicken 2 store in small kitchens Heer Than most other air fryers Let's face it, the kitchen appliance can completely dominate the countertop, leaving you with a little valuable training space. On help: Ninja Foodi, which is a pressure cooker, slow cooker and air roaster in one! And this multi-order product works exceptionally well in all 3 modes. You can even combine them so, for example, you can pressure to cook a whole chicken and then switch to a cover of fryer air to make crisp and brown skin while keeping the inside nice and moist. But wait, that's not all! Foodi also has 6 other options including dehydration, soote, steam and roast. All this functionality has a price. And this odd machine is heavy, so you want to plan on clearing space for it rather than lifting it in and out of the closet on a regular basis. Krups Fry Delight (Image credit: Krups) Type: Analogue Size: x 13.6 x 13.5 inches Capacity: 2.6 quarts Dishwasher Safe Parts: Yes Easy to Clean: Yes Management App: No/Recipes-Book Included Amazon Rating: 3.5 of the 5 Easy-to-use controls Relatively inexpensive Comets in black or white models Small temperature window Compact The air fryer is on our list, but its performance and compact size makes it a good alternative to some of the more expensive models here, especially if you have a small family or limited tabletop space. With its square shape, it's attractive too. Compared to other air roasters on this list, whose temperature range is measured in hundreds of degrees, Krups has a much smaller range - 300 to 390 degrees Fahrenheit - so you can't use it for much more than frying air. Customer reviews on Amazon praise Krups for producing crispy and great taste food in small quantities. However, a number of critical reviews complained that the pen had fallen off their devices after a relatively short period of use. How to choose the best fryer for you Air fryer range in size, shape, power and price. Those machines that cook enough for the whole family tend to be large and strangely shaped so eat some space on the countertop and not easy to take in and out of the closet or closet. Usually the best ones come with a relatively steep price, but they will probably come with digital temperature settings for accurate control. Here are five things to consider when buying an air fryer: Size: Most air fryers are not only small but irregularly shaped. Be sure to measure the space on the countertop where you plan to keep your air fryer and fryer air yourself before you make a purchase. Be sure to check how much space you have from the oncoming surface under the cabinets if you want to be able to move the fryer aside when you are not frying the air. If you don't plan to use it often, also consider how heavy the appliance is to see if it will be convenient to lift it in and out of the closet or closet. Capacity: Air fryers are available with a wide range of features ranging from about 2 1/2 quarts to as many as 8. If you have a large family, go for a bigger size. In a small air fryer you can only be able to fry half a pound of French fries or a couple of chicken pieces while in a large one you can fry a whole bag of frozen french fries and 8 pieces of chicken at once. Type of controls: Control of the dial is intuitive for work, but offers less accuracy. To set the time you are basically turning a mechanical timer that dings when the time has come. While digital management can take a little more work to figure out, they are accurate and allow special settings for different types of food, so you don't have to guesstimate what temperature to use and how long to cook. Other features: Some fryers do double duty, like other appliances. This gives you more versatility and means you'll have fewer products taking up space in your kitchen. However it also adds to the price of a fryer air so be realistic about whether you really also need, say, a toaster oven or a pressure cooker. Price: You can spend between \$50 and \$500. While the very best air fryers tend to cost more, you can get very good for about \$100. If you're not sure you'll use your air fryer often resist the temptation to spend the top dollar.
