The HACCP plan monitors hazards. If the results of a comprehensive review investigate the flaws, the HACCP team changes the HACCP plan. The team is able to access the plan at any stage for review and will change the plan if there are new hazards or if something important has been overlooked. If the HACCP plan is not working, then the HACCP team can and should make changes to improve it. Where there are improvements, changes may be made to increase the effectiveness of the HACCP plan. In this case, the HACCP team can continue to work on the plan and continue to improve it. If the HACCP team is not working, then the HACCP team can make changes to improve it. Where there are improvements, changes may be made to increase the effectiveness of the HACCP plan. In this case, the HACCP team can continue to work on the plan and continue to improve it.

The HACCP plan must be reviewed regularly. If the results of a comprehensive review indicate that the plan is not working, then the HACCP team can make changes to improve it. Where there are improvements, changes may be made to increase the effectiveness of the HACCP plan. In this case, the HACCP team can continue to work on the plan and continue to improve it.
